Maker Projects

LORENZO MARROCCHI

HARDWARE SYSTEM INTEGRATION ENGINEER

PROFILE

Embedded Systems Engineer by training, I currently work at Pasqal on the integration and validation of quantum processors. Passionate about prototyping and Maker culture, I enjoy building technical solutions. Always eager to create, I remain open to connecting over hands-on technical projects or collaborations in the audiovisual field.

WORK EXPERIENCE

PASQAL

June 2026 – Present

Hardware System Integration Engineer

Development of the global validation and integration strategy for new generation QPUs (Quantum Processing Units). Cross-functional work closely linked with engineering and technician teams on hardware systems.

AIRBUS DEFENCE & SPACE

March 2025 – Sep 2025

System Development Engineer

6-month internship focused on designing human-machine interfaces for space optical alignment on GSE equipment. Hexapod control, interferometric measurement processing, and reverse engineering of motorized stages.

PARROT

May 2024 – August 2024

Quality and Validation Engineer

4-month internship dedicated to functional validation including test plan creation, field trials, and non-regression testing. Defect tracking on TestRail and contribution to continuous improvement reviews.

PROJECTS

Underwater Drone

Design of a low-cost underwater drone for experimentation and monitoring.

Hugging Face Hackathon 2025

Development of a gesture interface for robotic arms. Aiming to make control natural and adaptable.

Real-Time Sign Language

Real time sign language recognition system using machine learning (Python, OpenCV, PyTorch).

Robotics Competition

ECECUP competition. Design of an autonomous robot meeting strict requirements. Programmed with Arduino and OpenCV.

My Portfolio

Personal website: lorenzomarrocchi.com. Portfolio dedicated to showcasing my work. Built without heavy frameworks (HTML, CSS, JS).

EDUCATION

ENGINEERING SCHOOL – ECE PARIS.LYON

2020 – 2025

Embedded Systems Major – Quantum Computing Option

INTERNATIONAL SEMESTER – UNIVERSITY OF MALAYA

2023 – 5 months

Kuala Lumpur, Malaysia
